

ABDELLAH RADI

FULL STACK DEVELOPER (Java Spring | Angular | MERN) | AI & Automation

- Casablanca, Morocco
- +212 693185212
- abdellahradi30@gmail.com
- www.linkedin.com/in/abdellah-radi/

PROFILE

Results-driven developer with a strong background in Fintech, where I designed and optimized payment management interfaces for **5,000+** users at XPI. I specialize in building robust enterprise applications using **Java/Spring Boot** and the **MERN** stack. Currently, I am leveraging my expertise to bridge traditional development with **AI**, integrating **Gemini** and **OpenAI APIs** into automated workflows (n8n). I combine technical rigor with a problem-solving mindset to build scalable, intelligent solutions for demanding environments.

SKILLS

- Backend & AI Orchestration:** Java (Spring Boot/Security), Python (FastAPI, Flask, Scripting), Node.js (Express.js), Gemini & OpenAI API Integration, LangChain, RESTful APIs
- Frontend & AI UI:** Angular, React, TypeScript, JavaScript (ES6+), Vercel AI SDK, HTML5, CSS3, Tailwind CSS, Bootstrap
- Databases:** MongoDB, PostgreSQL, MySQL, PL/SQL, Vector Search & Vector Databases (Pinecone/Milvus)
- Automation & DevOps:** Python Automation Scripts, n8n (AI Agent Workflows), Docker, Git, CI/CD Pipelines
- Methodologies:** Agile (Scrum), System Architecture, IT Support Optimization, Prompt Engineering, RAG Architecture

PROFESSIONAL EXPERIENCES

Application Support & Automation Consultant (External Contractor) | Client: Bank of Africa (via Procheck)

February 2026 – Present | Casablanca

- Support & Dev:** Maintenance of factoring business tools and automation of data flows via scripting (Python/Batch).
- Incident Management:** Technical diagnosis, SQL querying, and resolution of incidents according to SLAs.
- Infrastructure & Ops:** Server maintenance, network cabling, and optimization of data transfer interfaces.
- Stack:** Python, PL/SQL, Windows Server, Network Infrastructure, Application Support.

Permanent Contract - R&D Engineer | Expanded Payment International (XPI)

2024 - 2025 | Casablanca

- Frontend Performance:** Major optimization of the management interface (**5,000+** pro clients), reducing load times by **30%** via **JS** refactoring and optimized **DOM** management.
- Payment Expertise:** Direct collaboration with the Backend for the integration and testing of secure transaction **APIs**.
- Methodology & Versioning:** Evolutionary maintenance and source code management using **SVN** in a high-availability environment.
- Stack:** JavaScript, jQuery, Bootstrap, SVN, REST APIs, Eclipse.

Operational Internship - Full Stack MERN Developer | ARK-X Talent Factory

January - June 2024 | Casablanca

- Backend Architecture:** Design and deployment of robust **RESTful APIs (Node.js/Express)** with **MongoDB** index optimization, reducing response times by **60%**.
- Frontend Development:** Creation of an e-commerce platform (Art Gallery) with **React** and global state management via **Redux**.
- Data Security:** Implementation of a complete authentication system (**JWT**, **Bcrypt hashing**) and Role-Based Access Control (**RBAC**).
- Stack:** MongoDB, Express, React, Node.js, Redux.

EDUCATION

Qualification Certification: Full Stack MERN Developer - JobInTech

January - June 2024 | Casablanca

Bachelor's Degree: Physical Matter Sciences, Energy Option - Ain Chock Faculty of Sciences

October 2020 - July 2023 | Casablanca

International Baccalaureate: Physical Sciences, French Option - Lycée Taha Houssein

September 2019 - July 2020 | Casablanca

LANGUAGES

Arabic Native Language	French Advanced (C1)	English Advanced (C1)
